

PARTS OF THE BODY AND THEIR FUNCTIONS

Make a list of parts of the body with your child. In one column, list the part your child names and in the other column write what function that part has. For example:

<i>Part</i>	<i>Function</i>
mouth	eat, drink, talk
eyes	see, cry
nose	smell, breathe, sneeze

Use every opportunity in your child's daily routine—taking a bath, getting dressed, eating—to talk about her/his body parts and their functions.
