5. **{Southern Region newsletter article on Green Sanctuary accreditation}** Karen Hager (email July 2017) suggests:

You may have seen an article on a Green Sanctuary today in the Southern Region newsletter. I've copied it below, if you don't get the newsletter. Just wanted to pass along that I have received suggestions over the past couple of years for UUC to renew its Green Sanctuary accreditation. Thought it might be possible that would fit in with this group's efforts. No plan at this point to pursue this, as it needs a champion; just passing on the info.

Green Sanctuary accreditation is focused on starting congregations on a path to build UU impact inside and beyond our walls. Congregations are encouraged to join initiatives like Commit2Respond and Climate Action Teams leveraging for climate and environmental justice. Use the Green Sanctuary process as a tool for building a climate justice movement. Congregations will act with love and justice to heal the earth, support front-line communities to protect people and the web of life, and take courageous action in order to fight against environmental injustices and for a more sustainable way of life. Green Sanctuary aims to re-imagine the program while keeping the accreditation process intact, offering a simpler re-accreditation for congregations that have remained active post-accreditation. By fall 2017, we hope to launch a searchable database of con-

gregational projects, and launch congregational on-line reporting in 2018. To learn more about the program, [visit our website](#).
